SETHU

The credit score for any address in Hyderabad.

Type a place. Know whether to **buy** it, **price** it or **insure** it — and see exactly **why**.

Sethu = "bridge"
one engine, three people,
the same facts for everyone

LIVE EXAMPLE

Cyber Gardens Convention Centre

HITEC City · Ward 104 Kondapur

Location score
8 factors, each measured from this exact spot. Higher is better.

Water & flood safety	60
Health-care access	91
Schools & daily needs	94
Transit & main roads	100
Parks & lakes	93
Air quality (live)	69
Jobs & lifestyle hubs	100
Fire & police reach	100

68 m
nearest hospital (Medicover)

438 m
nearest metro (Hitechcity Jn.)

Dry
in an Oct-2020-size 192 mm storm

Customer report

For families buying or renting

- ✓ Plain-language verdict: **High caution · Proceed carefully · Looks reasonable**
- ✓ Flood depth, lake & nala distance, tank-encroachment status
- ✓ Nearest hospital, mall, metro, school, market
- ✓ **True-cost calculator** with duties, plus a price meter against the area's asking band

Why it matters: catches a lake, flood or over-pricing problem before the advance is paid.

REAL OUTPUT
₹90 lakh quote → **₹96.3 lakh** real cost (6% duties + 1% brokerage), and **₹7,500/sq ft** shown against the area's ₹7,747–13,464 band.

Real estate agent report

For agents and brokers

- ✓ **Selling points** you can lead with
- ✓ **What buyers will push back on** — with the facts
- ✓ Market price band from property portals
- ✓ Price check against your own comparables, plus commission and deal economics

Why it matters: close faster with evidence, and answer the flood question before it is asked.

REAL OUTPUT
Answers the lake / flood question **before the buyer asks**, and prices a listing with evidence instead of guesswork.

Insurer report

For underwriters and claims teams

- ✓ **Motor · Property · Health-access** risk tiers A–E, with the biggest drivers
- ✓ **Claim evidence check:** rain on the claim date, site susceptibility, official flood list
- ✓ 7-day rain outlook → likely claims surge
- ✓ API-ready output for underwriting systems

Why it matters: honest claims paid faster; doubtful ones reviewed with reasons, never accused.

REAL OUTPUT · RAIN-DAMAGE CLAIMS
13 Oct 2020, Tolichowki: 90 mm fell → **fast-track**.
2 Mar 2020, Banjara Hills: no rain → **investigate**.

C	C	A
Motor	Property	Health

WHERE IT HELPS

- Buying a flat near a **lake or nala** (HYDRAA & HMDA records)
- Pricing and negotiating a **listing**
- Triaging **monsoon claims** with rain evidence
- Banks: collateral location check NEXT
- Is the **road to the hospital** cut in a big storm?
- **Motor & home** underwriting by address
- City planning: **rainfall planner** with Japanese flood-control methods
- Other cities: Chennai, Mumbai NEXT

PROOF, SHOWN NOT CLAIMED

0.69 AUC on 8 real floods the model never saw	**0.79** AUC vs GHMC's own waterlogging list	**0.49** our first version — a coin flip. We show it.
145 GHMC wards covered	**1,192** tanks with 2014 vs 2023 encroachment status	**96** GHMC nalas with existing vs proposed width

Flood safety is **one of eight** factors (22%). The flood ranking is the validated part; everything else is a labelled indicator. Ward-level, not street-level.

BUSINESS & ASK

Customers pay per report
Agents pay per client report
Insurers & banks license the API
Built on **public data only** — a new city in days

Try your own home

The ask: one insurer pilot, in shadow mode on their closed claims.

Data: OpenStreetMap · Overture Maps · Telangana State GIS · HYDRAA · HMDA · OpenCity · Open-Meteo · SRTM

Decision aid · asking prices, not deal prices · verify legal FTL status with HMDA
